With over than 2 years as a Frontend Engineer, I specialize in translating complex technical concepts into visually appealing, user-friendly interfaces. Proven in building, debugging, and implementing features in challenging software environments, I'm a collaborative team player known for high-quality work and strong problem-solving. My graphic design background adds a designer's eye to my approach. Eager to continually learn and elevate my skills within the programming realm.

Experience

MARCH 2023 – PRESENT

Frontend Engineer / NARD POS, Amman, Jordan (Remote)

- Seamlessly transitioned from a 3-month internship to a full-time position, approaching a significant milestone of more than one year of cumulative experience.
- Mastered Angular framework while contributing extensively to software enhancements, new feature additions, and effective debugging and testing. Stack Used: Angular, JavaScript, Typescript, SCSS, PrimeNg, MySQL, Node.js
- Enhanced the software's inventory management section by 80% using shared and reusable component and by handling asynchronous data flow more effectively. These changes ensured significant satisfaction to NARD's clients who use the POS software in managing their store's inventory.

January 2023 – March 2023

Graphic Designer Intern / QUAD Digital Media, Tripoli, Lebanon (On-site)

As a graphic designer, I consistently delivered timely and creatively crafted graphical illustrations and posts for the digital media team. My designs effectively conveyed marketing messages, contributing to increased client collaboration. This creative approach played a crucial role in achieving the company's growth goals and vision.

Skills

JavaScript • Typescript • React JS • Angular • Next JS • Prime Ng • Tailwind CSS • HTML • CSS • Git • GitHub • OOP • Redux Toolkit • Jest • React Testing Library • Firebase • Node.js • RESTful API

Education

JULY 2022 – NOVEMBER 2022

Frontend Web Development / Re:Coded

Completing a 5-month immersive design bootcamp, with 400+ hours of curricula and project-based learning. Learned technologies: HTML, CSS, JavaScript, and React
